Proposal:	Removal of the existing rear conservatory and erection of a single-storey flat-roof rear extension, incorporating external alterations including cladding to the single-storey elements, altered rear fenestration, insertion of a rooflight, installation of roof-mounted solar photovoltaic (PV) panels on the south-east roof slope, and provision of an electric vehicle (EV) charging point.
Letters received:	None at the time the observations were made
Observations:	This council supports the application.

Reference:	26/1334/FUL
Address:	Windrush, 8 Marine Parade EX9 6NS
Proposal:	Installation of 11 roof mounted solar panels
Letters received:	None at the time the observations were made

Observations: The Town Council supports the application, subject to the following condition:
The proposed PV panels should mirror the layout of those installed on the neighbouring property, 7 Marine Parade. This would help to minimise the visual impact of the installation and maintain a consistent appearance within the terrace.

Members recognised the need to balance the benefits of renewable energy with the preservation of the area's built heritage. Concern was expressed regarding the prominence of the panels on the front elevation, and Members considered that matching the layout at No. 7 would reduce their visual impact and better respect the established streetscape. Alternative options, such as slate photovoltaic tiles, were discussed, although Members acknowledged that these would be a more difficult and potentially less practical installation. This would help support policy H2 of the Budleigh Salterton Neighbourhood to 'maintain the local distinctiveness of the town' while also supporting local and national objectives regarding green energy usage.
